RAHUL VISHWAKARMA

SENIOR FULL STACK DEVELOPER

Burhanpur, Madhya Pradesh 450331, India | karmarahul67@gmail.com | +91 9131114837 | LinkedIn | Portfolio

PROFILE

Senior Full Stack Developer with hands-on experience architecting and scaling multi-tenant SaaS platforms and booking marketplaces in healthcare, education and social domains. Specialized in TypeScript, Node.js, React, Next.js, PostgreSQL, and GCP, with full ownership of backend architecture, ACL/RBAC security, mobile applications, database migrations, cloud deployments, and high-priority production systems. Immediate joiner.

PROFESSIONAL EXPERIENCE

Full Stack Developer, Hind Social Network Pvt. Ltd. **May 2026 to Present**

Ahmedabad, India

- Owned and delivered the **Services Module end-to-end in 4 months** (live 30 Sep 2026): categories, collections, service CRUD, and booking/scheduling for **3 service types**.
- Architected **3-tier ACL/RBAC** (admin, vendor, customer) with ownership checks across all service, collection, and category APIs; built **admin earnings** and strict **vendor verification** flows.
- Engineered multi-step service creation with strict **server-side validation and input sanitization**, plus caching and query tuning for thousands of booking transactions.
- Delivered full **Safari/iOS (WebKit) compatibility** and mobile-responsive UI with no Safari-specific breakages.
- Independently built a **WhatsApp AI Agent POC** (OpenAI API, Twilio, Node.js/Next.js) in **under 24 hours** enabling conversational booking via LLM tool-calling.
- Achieved **Google Play Store approval** for the Capacitor/Next.js-WebView app after prior attempts had stalled.
- Contribute to platform security via the **Blue Team initiative**, identifying **50+ vulnerabilities** and hardening opportunities; built event notification workflows on **Novu**.

Full Stack Developer, Script Assist UK (Remote) **Nov 2024 to May 2026**

London

- Architected and scaled a **multi-tenant healthcare SaaS platform** (TypeScript, Node.js, React, PostgreSQL, Zustand) supporting **20+ clinics and pharmacies** with strict data isolation.
- Built and deployed **Android & iOS patient apps using CapacitorJS**, serving **5,000+ patient users** on a shared web-mobile architecture.
- Owned production systems on **Google Cloud Platform (GCP)**, managing deployments, PostgreSQL migrations, and ACL-based security, ensuring **99.9% uptime**.
- Optimized legacy codebase and database queries, reducing production issues while maintaining **zero critical data breaches**.

Full Stack Developer, Student Diwan **May 2024 to Feb 2025**

Qatar

- Developed and deployed a scalable **multi-tenant school management system** for multiple institutions.
- Implemented **role-based access (students, teachers, admins)** with secure authentication.
- Built core modules: attendance, fees, academics, and administrative workflows.
- Designed scalable backend architecture for concurrent multi-school operations.

Freelance Backend Developer, Self-Employed **Aug 2023 to Feb 2024**

Remote

- Developed backend modules using Laravel (PHP) for small-scale client and academic projects.
- Built RESTful APIs with JWT/session-based authentication, and managed MySQL databases.
- Worked with routing, middleware, and Eloquent ORM on shared hosting deployments.
- Collaborated directly with clients to gather requirements and deliver on timelines.

Space Launch Vehicle Intern, Omspace Rocket and Exploration Pvt Ltd. **Dec 2022 to Jan 2023**
Ahmedabad, India

- Contributed to rocket engine design optimization for improved efficiency and thrust.
- Worked with industry-standard rocket design software for simulation and analysis.
- Assisted in trajectory analysis and orbital mission planning.
- Researched rocket fuels and supported fuel efficiency improvements.

ACCOMPLISHMENTS

- Delivered an entire **services marketplace module in 4 months**, shipped to production on deadline.
- Scaled multi-tenant healthcare SaaS supporting **20+ clinics and 5,000+ users**.
- Maintained **99.9% uptime** across GCP production environments.
- Delivered cross-platform **Android & iOS patient apps** in live healthcare systems.
- Enforced strict **ACL-based architecture** with zero critical data breaches.

AREAS OF EXPERTISE

TypeScript	JavaScript	Node.js	React.js
Next.js	PostgreSQL	Nest.js	Zustand
Google Cloud Platform (GCP)	Redis DB	MongoDB	REST APIs
ACL / RBAC	OpenAI API	Laravel	PHP

EDUCATION

Bansal Institute of Research Technology and Science **2023**
B.Tech in Computer Science and Engineering, Bhopal
7.91 CGPA

Seva Sadan Higher Secondary School **2019**
Class 12th, Burhanpur, M.P.

Seva Sadan Higher Secondary School **2017**
Class 10th, Burhanpur, M.P.
