RAHUL VISHWAKARMA

SENIOR FULL STACK DEVELOPER

Burhanpur, Madhya Pradesh 450331, India | karmarahul67@gmail.com | +91 9131114837 | LinkedIn

PROFILE

Senior Full Stack Developer with hands-on experience architecting and scaling multi-tenant SaaS platforms in healthcare and education domains. Specialized in TypeScript, Node.js, React, PostgreSQL, and GCP with full ownership of backend architecture, mobile applications, database migrations, cloud deployments, and high-priority production systems.

PROFESSIONAL EXPERIENCE

Full Stack Developer, Script Assist UK (Remote) **Nov 2024 to Present**
London

- Architected and scaled a **multi-tenant healthcare SaaS platform** using TypeScript, Node.js, React, PostgreSQL, and Zustand, supporting **20+ clinics and pharmacies** with strict cross-organization data isolation.
- Built and deployed **Android & iOS patient applications using CapacitorJS**, maintaining a shared web-mobile architecture serving **5,000+ patient users**.
- Owned production systems on **Google Cloud Platform (GCP)**, managing deployments, PostgreSQL migrations, ACL-based security, and critical cron workflows (prescriptions, inventory allocation, appointments), ensuring **99.9% uptime across client environments**.
- Optimized legacy codebase, database queries, and RJSF-based dynamic form builder, reducing production issues and improving system reliability while maintaining **zero critical data breaches**.

Full Stack Developer, Student Diwan **May 2024 to Feb 2025**
Qatar

- Developed and deployed a scalable **multi-tenant school management system** for multiple institutions.
- Implemented **role-based access (students, teachers, admins)** with secure authentication.
- Built core modules: attendance, fees, academics, and administrative workflows.
- Designed scalable backend architecture to support concurrent multi-school operations.

Space Launch Vehicle Intern, Omspace Rocket and Exploration Pvt Ltd. **Dec 2022 to Jan 2023**
Ahmedabad, India

- Contributed to rocket engine design optimization for improved efficiency and thrust performance.
- Worked with industry-standard rocket design software for simulation and analysis.
- Assisted in trajectory analysis and orbital mission planning.
- Researched rocket fuels and supported fuel efficiency improvements.

Freelance Backend Developer, Self-Employed **Aug 2023 to Feb 2024**
Remote

- Developed backend modules using Laravel (PHP) for small-scale client and academic projects.

- Built RESTful APIs, implemented authentication (JWT/session-based), and managed MySQL databases.
- Worked with routing, middleware, Eloquent ORM, and deployed applications on shared hosting platforms.
- Collaborated directly with clients to gather requirements and deliver backend solutions within timelines.

ACCOMPLISHMENTS

- Scaled multi-tenant healthcare SaaS supporting **20+ clinics and 5,000+ users**.
- Maintained **99.9% uptime** across GCP production environments.
- Delivered cross-platform **Android & iOS patient apps** in live healthcare systems.
- Enforced strict **ACL-based architecture** with zero critical data breaches.

AREAS OF EXPERTISE

TypeScript	JavaScript	Node.js	React.js
PostgreSQL	Laravel	PHP	MongoDB
Google Cloud Platform (GCP)	Redis DB	Nest.js	Zustand

EDUCATION

Bansal Institute of Research Technology and Science **2023**
B.Tech in Computer Science and Engineering, Bhopal

7.91 CGPA

Seva Sadan Higher Secondary School **2019**
Class 12th, Burhanpur, M.P.

Seva Sadan Higher Secondary School **2017**
Class 10th, Burhanpur, M.P.
